

Eastern Sierra Climate & Communities Resilience Project

SCOPING MEETING

WE NEED YOUR INPUT!

Please JOIN US to learn more about the ESCCRP PROPOSED ACTION at an information sharing meeting. Participants will have an opportunity to review displays, watch a brief presentation and speak with project team members.

PROJECT OVERVIEW

The ESCCRP, known as the “Mammoth Donut Project”, seeks to improve forest health and resilience and reduce the potential of catastrophic wildfire on 56,000 acres around the Town of Mammoth Lakes (see figure for ESCCRP boundary). This would be done by reducing tree density through mechanical and hand thinning methods, bringing the landscape closer to its natural condition.

More information about the project, including a detailed proposed action and how to submit comments regarding issues, opportunities, concerns or suggestions, can be found on the project website at: <https://bit.ly/3Uzwthh>

The public scoping period will be from October 18th - November 18th, 2022.

VIRTUAL MEETING

November 2nd, 2022
10:00 - 11:30 am
